The Waves (2015).

Sophia Platts-Palmer (b.1991)

Sophia Platts-Palmer is a London-born illustrator living and working in Glasgow. Her work draws on her degree background in English literature and history of art, and is a hybrid of pictorial references to classicism and postmodern narrative themes. Much of her work addresses her own significant experiences with her mental health, womanhood and generational identity with a focus on the plurality of self, fluidity of gender, fractured identities and the comparisons between the female form and processes and phenomena of the natural world. Sophia has recently graduated with a masters in Curatorial Practice and Contemporary Art from the Glasgow School of Art.

The Waves is inspired by Virginia Woolf's novel of the same name and draws comparisons between the strength of womanhood and the overpowering force of the sea. The sea-swell serves as an allegory for the difficulties that women suffering from mental health issues often experience, with references to themes of loneliness and mental drowning.
